SUMMARY

Senior Android Engineer with 10 years building consumer and merchant apps at Indonesia's largest technology companies, including products with 100M+ downloads. Strong in Kotlin, Jetpack Compose, MVVM and MVI, multi-module and clean architecture, Coroutines, Flow, dependency injection, and CI/CD. Recent focus on server-driven UI, anti-fraud and KYC integration, and app size and performance optimization. Experienced leading cross-team delivery, running Agile sprint planning, and mentoring senior engineers.

EDUCATION

University of Indonesia (Universitas Indonesia)	Jakarta, Indonesia
<i>Master Information Technology · GPA: 3.42 of 4</i>	2023 - 2026
Brawijaya University	Malang, East Java, Indonesia
<i>Bachelor Computer Science · GPA: 3.53 of 4</i>	2011 - 2016

WORK EXPERIENCE

Gojek (GoTo Company)	Jakarta, Indonesia
<i>Senior Software Engineer (Android)</i>	November 2019 - Present
<i>Indonesia's largest tech group (Gojek + Tokopedia). GoFood Merchant is the merchant app for F&B owners nationwide, with 5M+ downloads.</i>	

- Layout and campaign changes needed a full app release. Implemented server-driven UI, so new initiatives now launch through configuration.
- Bank account changes drove 3,000 manual tickets monthly. Built a self-serve flow with real-time FRS risk checks, removing the ticket load.
- Merchant sentiment was invisible after release. Built a reusable feedback module that collected 56,290 responses at 4.65/5 average.
- Corporate onboarding was hard to extend. Led MVI adoption, migrated to ViewBinding, and split Help Center and Onboarding into 2 modules.
- Oversized APK raised install friction. Cut ~10MB via rebranding cleanup, POS build optimization, and legacy flow removal.
- Web lacked native capabilities. Built a JS Bridge letting WebView invoke native Android functions, unlocking 1-2 financial features.
- Team was scaling under hiring pressure. Onboarded 3 Senior Android Engineers, ran interview panels and sprint capacity planning.
- New hires needed production-ready skills. Coached 23 GoTo bootcampers over 4 days and led curriculum design.

Ministry of Education, Culture, Research, and Technology	Jakarta, Indonesia
<i>Practitioner Lecturer</i>	2022 - 2025
<i>National "Praktisi Mengajar" program placing industry practitioners into university classrooms.</i>	

- Universities lacked hands-on mobile teaching capacity. Taught Android native and Flutter at 5 universities.
- Students had little industry visibility. Delivered guest lectures on the software engineering career path.

DANA	Jakarta, Indonesia
<i>Senior Software Engineer</i>	July 2017 - October 2019
<i>Leading Indonesian digital wallet (backed by Ant Group), built from scratch and now at 100M+ downloads. Also delivered TIX ID, at 10M+ downloads.</i>	

- TIX ID needed faster delivery. Led a 3-person offshore Android team, shipping 7+ features on a 10M+ download app.
- Images were oversized on low-end devices. Integrated Alicloud CDN with screen-aware resolution, improving load efficiency ~20%.
- Campaign links dropped users at app entry. Integrated Branch.io dynamic links and designed the token generation logic.
- Team depth limited delivery quality. Mentored 2 engineers, 1 Associate and 1 Staff Android Engineer.
- Backend dependencies blocked delivery. Contributed to Java Spring mobile gateways and user modules.

Ice House	Jakarta, Indonesia
<i>Software Engineer</i>	October 2016 - June 2017
<i>Product consultancy building mobile and web products for enterprise and telco clients.</i>	

- Client needed a payments app from zero. Built PayPro's first version end-to-end for Indosat.
- Boilerplate slowed delivery. Built reusable Android libraries adopted across projects.

SKILLS

Android Native Development: Kotlin, Jetpack Compose, MVVM, MVI, Coroutines, Flow, Multi-Module Architecture
Flutter Development: Dart, State Management, Git
Backend Development: Java, Spring Boot, Unit Test, Integration Test, Git

Web Development: JavaScript, AngularJS, PHP, HTML, SQL

PROJECTS

GoFood Merchant Apps (GoBiz)

Merchant app for F&B owners across Indonesia. 5M+ downloads, 4.1/5 rating.

Kotlin · Jetpack Compose · MVVM · MVI · Multi Modular Arch · Clean Arch · Room DB · Retrofit · Coroutines · Flow · StateFlow · Gojek Internal Tool · CleverTap Event Tracker · Firebase

<https://play.google.com/store/apps/details?id=com.gojek.resto&hl=id>

Gojek Consumer Apps

Indonesia's #1 on-demand super-app for rides, food, and delivery. 100M+ downloads, 4.7/5 rating. Prototyped the cross-app delivery initiative that won GoTo Hackathon 2025.

Kotlin · Jetpack Compose · MVVM · Multi Modular Arch · Clean Arch · Coroutines · Flow · Gojek Internal Tool · Firebase

<https://play.google.com/store/apps/details?id=com.gojek.app&hl=id>

GoPay Consumer Apps

Digital wallet for Indonesian consumers covering QRIS, transfers, and bills. 100M+ downloads, 4.7/5 rating. Extended the delivery initiative across both consumer apps.

Kotlin · Jetpack Compose · MVVM · Multi Modular Arch · Clean Arch · Coroutines · Flow · Gojek Internal Tool · Firebase

<https://play.google.com/store/apps/details?id=com.gojek.gopay&hl=id>

TIX ID Apps

Cinema and event ticketing for moviegoers across Indonesia. 10M+ downloads, 4.8/5 rating.

Kotlin · Java · Room DB · RxJava2 · Dagger2 · Firebase · Retrofit · MVP · Clean Arch

<https://play.google.com/store/apps/details?id=id.tix.android&hl=en>

DANA Apps

National digital wallet built from scratch, licensed by Bank Indonesia. 100M+ downloads, 4.7/5 rating.

Java · Room DB · RxJava2 · Dagger2 · Retrofit · Alipay Internal Tools · Firebase · MVP · Clean Arch

<https://play.google.com/store/apps/details?id=id.dana&hl=en>

PayPro Apps

Fintech payment app for Indosat subscribers (white-label client project).

Java · RxJava · Dagger2 · ORM · Retrofit · Firebase · MVP · Clean Arch

AWARDS

Champion of GoTo Hackathon

November 2025

GoTo Company

As team "Kompur", built a delivery feature linking the Gojek and GoPay consumer apps. 1st among 74 teams from Indonesia, India, Singapore, and China.

2nd Winner Hackathon Google Indonesia Android Kejar

May 2016

Google with Ministry of Education

Mobile solution for education reporting.

1st Winner Inovasi Teknologi (INOTEK) East Java, IT Category

January 2015

BALITBANG East Java

Winner "Mobile Apps Development Competition", Health & Fitness Category

January 2014

Vocational Computer Festival, Gadjah Mada University

Finalist & Best Category in "World Citizenship" IDTECH

January 2014

Microsoft
